PROFESSIONAL SUMMARY

Results-oriented **IT Systems Analyst** with **4+ years** of experience in **IT support and systems analysis**. Proven ability to **troubleshoot and resolve complex technical issues**, **configure and maintain IT systems**, and **deliver exceptional customer experiences** in fast-paced environments. Seeking to contribute skills and experience to a forward-thinking IT team as an End User Computing or Systems Analyst professional.

Highlights of Qualifications

- Second and third level IT support, incident resolution, and systems troubleshooting
- Networking and VPN configuration (LAN/WAN, routers, switches)
- Web development and maintenance (HTML, CSS, JavaScript)
- Workstation setup, hardware diagnostics, and software installation and configuration
- Preventive maintenance and troubleshooting of electromechanical and automated systems
- Strong documentation, knowledge base development, and CMMS tracking

PROFESSIONAL EXPERIENCE

Maintenance & IT Technician Haad Exports — Toronto, ON 08/2023 – 11/2024

- Served as the sole on-site technician responsible for both IT systems and mechanical equipment, providing end-to-end operational support across the facility
- Diagnosed and resolved IT issues including network outages, VPN configuration, workstation setup, and software troubleshooting to ensure business continuity
- Designed, updated, and maintained the company webpage, ensuring accurate content, uptime, and improved user experience
- Configured and managed LAN/WAN networking infrastructure including switches, routers, and VPN access for staff
- Documented IT incidents, maintenance activities, and resolutions using CMMS and internal tracking systems

Technical Support Professional II Concentrix — Halifax, NS 06/2020 – 06/2022

- Provided second and third level technical support to a diverse client base, resolving hardware, software, and network issues efficiently
- Improved customer satisfaction by **95%** through consistent delivery of high-quality, empathetic technical assistance
- Diagnosed and resolved technical issues related to customer accounts, configurations, and IT systems using structured troubleshooting methodologies
- Developed and maintained a comprehensive knowledge base for common technical issues, enabling team members to resolve complex problems more efficiently

- Tracked, documented, and retrieved support cases using ticketing and database management tools
- Configured and troubleshot customer accounts and technical systems, ensuring minimal disruption to end users

IT Systems Analyst Lebanon Express — Toronto, ON 11/2018 – 03/2020

- Maintained and updated company website, ensuring uptime and content accuracy
- Performed software installation, configuration, and patch management across corporate systems
- Resolved technical issues and escalated complex problems through appropriate channels to minimize downtime
- Collaborated with stakeholders to assess IT needs and implement effective solutions
